Ellis Running for Reelection to Montana Legislature

HELENA, MT - Today long-time Helena resident Janet Ellis announced that she is running for reelection as Representative of Helena's House District 81 in the Montana Legislature. Ellis is seeking a second term. In 2015 Ellis served on the House Appropriations Committee, which develops the state's budget.

Ellis is looking forward to serving her district. She vows to continue to bring commonsense leadership to the legislature, building on her first term as a legislator, and combining that experience with almost 25 years of work as an advocate for conservation and election reform.

"I've lived in Helena for over 25 years and love our community and state passionately," said Ellis. "My career has been built on being fair, honest, and able to work with people who don't always share my views on every issue. Now more than ever, Montana needs to have experienced leadership to help move our state forward."

Ellis has a strong background in conservation, having worked for Montana Audubon for more than 25 years. As a legislator, Ellis currently serves on the state's Environmental Quality Council, which oversees programs within the Montana Department of Natural Resources, Department of Environmental Quality, and Fish, Wildlife & Parks. Ellis works hard to tie a clean environment to good jobs.

"I'm excited that Janet is running for reelection," said Chuck Hunter, Minority Leader in the Montana House. "Representative Ellis is a hard worker, has a rich background of knowledge on a variety of issues affecting Montana, and isn't afraid to stand up for courageous positions when it's important."

Janet and her husband Jim have lived in Helena for over 25 years. Their son, Dan, graduated from Helena High School in 2013.
